Electronic Bulletin No. 285

Emergency Track Work-Feather River Canyon

Dear Valued Customer:

Due to emergency, unplanned track work in the Feather River Canyon between Oroville and Portola, California on the route supporting Pacer Stacktrain service between Northern California, the Midwest and the Northeast, gate cutoffs at Oakland and Lathrop for all volume destined Kansas City, St. Louis, Chicago and beyond are TEMPORARILY revised to 1700 Monday through Friday.

This TEMPORARY earlier cutoff will permit operation of the train supporting Pacer Stacktrain business through the affected area prior to the 8 hour daily closure of the route.

This revision is effective immediately, Thursday, April 18, 2002 through Wednesday May 8, 2002 or until previously notified that cutoffs will return to normal, advertised times.

We apologize for this very short notice. This condition was not previously planned, but is very necessary to insure future timely and consistent operation on the route. The UPRR track structure on this portion of the route had been damaged by previous minor derailments and requires immediate repair. We appreciate your understanding and patience.

Thank-you for your continued support, cooperation and for shipping on Pacer Stacktrain.
