

PACER STACKTRAIN

NEWS ALERT

September 30, 2002

Electronic Bulletin No. 337

West Coast Port Situation Advisory

Please be advised that the West Coast port closures have resulted in restrictions being implemented by the all railroads impacting primarily international shipments. Currently, international containers, loaded or empty, with a West Coast destination will not be accepted in-gate or via interline interchange.

Domestic 48' and 53' containers will not be affected by these restrictions and Pacer Stacktrain continues normal operation of its domestic train network. However, some delays may occur at West Coast destinations due to terminal congestion and availability of chassis.

If you have any questions regarding this announcement please contact your Pacer Stacktrain Business Development Representative.
