RE: New 53' 110" Equipment and Availability Update

Dear Valued Customer,

We are pleased to confirm that our new 53' 110" containers will begin to arrive in the LA Port area in April 2003. By November 2003, 3,500 containers will have arrived and will be available for use throughout most of the Pacer Stacktrain network.

This significant equipment investment will transform our fleet into predominately 53' containers. Manufactured with lighter weight Swedish steel and stronger oak plank flooring, these new containers will be more durable and allow an increase in forklift weight capacity. The 110' door opening will enable more loading flexibility. For more information visit www.pacerstack.com to view our new 53' equipment brochure and equipment specifications.

While our 53' 110" containers can be used for most Pacer Stacktrain locations within the United States, there are specific locations that 53' 110" equipment will temporarily **not** be able to serve. They are as follows:

All Mexico Locations

Charleston
Detroit
El Paso
Laredo
Miami
Montreal
New Orleans
Savannah
St. Paul
Toronto

During 2004 we plan to expand our service offering for 53' 110" containers to the above-mentioned points.

Please contact your local Business Development Representative if you have any questions or our Equipment Reservations Department at **877-816-1810**.
