RE: Service Revision Notification

Distribution:

Effective Monday, March 29, 2004, all volume originating at Laredo, Tx and Mexico interior points destined Los Angeles, will terminate at City of Industry in lieu of LATC.

The LATC terminal is currently oversubscribed which is negatively affecting westbound service from the aforementioned origins. This revision is meant to stabilize this service and assist in the overall efforts to reduce congestion in LATC.

If you have specific questions, please direct them to our Business Development Team.

Thank you,

Pacer Stacktrain
