Re: New Load Layover Service Reduces Ramp Storage Costs

Dear Valued Customer:

Pacer Stacktrain is pleased to announce our new Load Layover service to help you deal with the rising costs of rail ramp storage. Instead of leaving your inbound Pacer Stacktrain loads at the rail ramp and paying high rail storage costs or dealing with multiple draymen to store a load at an unknown street location, Pacer Stacktrain Load Layover allows you to have your load stored in a secure location at a reasonable rate.

Pacer Stacktrain Load Layover service offers you several benefits including:

Greatly reduced storage costs – much less than rail ramp locations

Better information – including detailed daily reporting

Better security – our facilities are bonded, fenced, well lit, and staffed 24x7. We verify the seal number and fit your load with a high-security lock.

Better pickup service for your draymen

- No hunting for your load – our yards are compact and organized, so we know exactly where your load is.
- Fewer repair delays – We will pre-inspect the equipment twice – once when we leave the ramp and again when it enters our yard.
- No waiting in line at the gate – our gate processes are extremely efficient, so your draymen will not be waiting in long lines. And we re-use the original pickup number from the railroad, to keep things simple.

It's easy to get started with the Pacer Stacktrain Load Layover service.

You can have individual loads pulled from the rail ramps or, with an agreement on file; we will automatically pull all of your loads from the rail ramps as rail storage free time expires.

Complete details, terms, and conditions of the Load Layover service are outlined in the Rules & Procedures section of the Pacer Stacktrain Information directory, available at www.pacerstack.com. Call your Business Development Manager for more information today!

We appreciate your business.
